Version Overview

CMD600 - CD V108

NEW CMD-Assistant (Version: 1.2.6.0)

>>> **ATTENTION: Starting with assistant-version 1.2.4.0 only CMD600 with firmware 3.0 and higher can be used.**
Devices with firmware 2.9 and lower are shown in the device-scan but marked red with a note for firmware-update.

Bug-Fixes:

- Correct handling of negative limit-switch adjustments.

CMD600 - CD V107

NEW CMD-Assistant (Version: 1.2.4.0)

New:

- Implementation of latest firmware-updates: e.g. 2 independent, internal, parameter-sets in the CMD, device-identification via flashin LED (for more please see firmware 3.15 release-note CMD600).
- Implementation of gateway-address to use the CMD600 in a network behind a gateway/router.
- Implementation of 10 languages: german, english, french, spanish, portugese, italien, czech, dutch, chinese, japanese.
- Update of the pdf-user-manuals and online-help.

Bug-Fixes:

- Several smaller text corrections.

RELEASEnotes

CMD600 - CD V106

NEW CMD-Assistant (Version: 1.1.5.0)

New:

- Indication of the IP-address of the host system in the device-scan-window in the assistat.
- Implementaion of the languages: spanish, portuguese, czech, japanese.
- Update of the pdf-user-manuals and online-help.

Bug-Fixes:

- Indication of „Overflow“ in the measuring-window, if CMD600 has run into overload mode. After the next reset/operate signal the reading continiues.
- Conectify running correct now, when switching from online to offline-modus several times.
- Several smaller text corrections.

*****CMD-Assistant is available as free download on www.hbm.com*****

Please always use the latest firmware and software version, available on HBM.com's download section: → [Support](#) → [Software / Firmware Downloads](#) → [Industrial amplifier](#)
